DETAILED ACTION

Reasons For Allowance

1. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the claimed combination including the limitations directed to the specifics of a method of operating a camless engine valve by a control program comprising determining a safe trajectory for the engine valve to avoid a collision with another engine valve or piston; determining a desired trajectory for the engine valve; sensing the actual engine valve trajectory, controlling the actuators to close the engine valve, if the actual engine valve trajectory deviates into an unacceptable trajectory.

Regarding claim 20, the claimed combination including the limitations directed to the specifics of a method of operating a camless engine valve by a control program comprising determining a safe trajectory for the engine valve to avoid a collision with another engine valve or piston; determining a desired trajectory for the engine valve; sensing the actual engine valve trajectory, if the actual engine valve trajectory deviates from the desired trajectory by more than an allowable deviation, controlling the actuators to reduce the deviation; controlling the actuators to close the engine valve, if the actual engine valve trajectory deviates into an unacceptable trajectory.
